

Nasiol Anti-GRM

Protective Nano Surface Coating for Easycleaning of Graffiti

Effective and Durable Graffiti Protection

Anti-GRM Antigrffiti is nano clear coat for metal, painted and hard surfaces

- Nasiol Anti GRM is the last enhanced non-sacrificial formula of antigrffiti coatings and specially developed for metal and painted surfaces as well as can be applied on other hard surfaces like glass and plastic.
- The coating bonds to surface chemically with an ultra thin layer of 800 nm which makes it hard to remove from surface and peeling of coating can not occur like conventional antigrafftii products. Product is specialized on paint and metal surfaces to obtain maximum longevity, cleaning efficiency and product consumption.
- REACH certified and low VOC formula apply to all environmental and health regulations on world.
- Apart from its ultimate antigrffiti benefits, it protects surface from stain, debris, harsh conditions and increase longevity of applied surface.
- It is transparent and thanks to its technology that one component and one coat product can be durable up to 3 years and 40 washing cycles.
- Thanks to the specialized product that consumption on surfaces are very low that it makes product cost efficient and environmental friendly.
- A simple stage pressure washing will be enough to remove all antigrafftii from surface.

Application is Easy and Effective

Just spray with an airless spray and buff with microfiber mop for hard to reach areas.

Technical Comparison Facts Table

Product	Anti GRM	Other products
Consumption	3-5 ml/m2	30-60 ml/m2
Environmental effect of chemical	Up to 20x less	-
Cost of product per m2-application	n times	5.3n times
Longevity of product	3n times	n times
Total cost/investment of application	n times	15.9n times
